

The Messenger of Mathematics Volume 29-30

Filesize: 6.51 MB

Reviews

This publication is fantastic. We have read through and i am certain that i will planning to read yet again yet again down the road. You wont feel monotony at at any time of your respective time (that's what catalogs are for concerning when you request me).

(Alec Langosh)

THE MESSENGER OF MATHEMATICS VOLUME 29-30

To download **The Messenger of Mathematics Volume 29-30** eBook, make sure you refer to the web link below and save the document or gain access to additional information which might be related to THE MESSENGER OF MATHEMATICS VOLUME 29-30 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: .fl, Then $12 = 0$ is the condition that the line $lx + my + nz = 0$ should pass through one of the circular points at infinity, and $t = 0$ is the condition that the lines $lx + my + nz = 0$, $lx + my + nz = 0$ should be at right angles. It is known that θ is the angle between the lines $(/tnn)$, $(lrriri)$, where Further S , the distance between (xyz) , $(x y z)$, is given by $\theta = (pqrliryn(yz - y z, zx - z x, xy - x y))$. Results from which these can be at once deduced are to be found in a paper by VV. K. Clifford Quarterly Journal of Mathematics, Vol. VII., pp. 54--67, Analytical Metrics cf. Coll. Works, xi. and xvi.). Having stated these results for convenience of reference I proceed to discuss the problem in hand. The point of contact of the line (lmn) with its envelope will be given by where dots indicate differentiation with respect to t . Further, we may take k to be unity without loss of generality. Then the distance between two points on the envelope is θ , where $\theta = (pgr/1) (dty fi (yz--yz, zi--zx, xy--xy))$. We have put $/ = 1$ in the denominator, to avoid retaining higher powers of dt . Now we have, on substitution, Similarly the angle between the corresponding tangents is given by If we put $= 1/5$, $q=ja$, $r=l$, $C=w$, and then make...
